Research Assistant
Contractual Position – 200 hours

Duties:

The successful applicant will perform intermediate level, moderately difficult professional and technical work in a research support capacity. Duties include work related to a project focused on the use of a virtual simulation game as a means to ensure continued competency in nurses caring for pediatric patients. Specifically, roles of the successful applicant will include literature review, data collection/analysis/interpretation, conducting interviews with participants, and performing other related duties as required.

Qualifications:

Some related work experience (up to one year); completion of post-secondary education with graduate level research experience preferred. Good communication, interpersonal skills, organizational, writing and presentation skills are assets.

Salary:

$25/hour for total of 200 hours = $5,000

Closing date: October 31st, 2022
